

How Might We

1. How Might We empower early-stage Alzheimer's patients to retain their independence with discreet support that upholds their dignity?
2. How Might We deliver culturally-tailored, easy-to-understand Alzheimer's information and practical guidance to Egyptian families?
3. How Might We create a trusted community for Alzheimer's patients and caregivers in Egypt to share experiences and reduce feelings of isolation?
4. How Might We offer working caregivers peace of mind through intelligent, non-intrusive monitoring tools that alert them to urgent needs?
5. How Might We adapt home environments to prevent accidents for Alzheimer's patients while preserving a sense of familiarity and comfort?
